# PREFACE

This statistical report contains data which provide insight into the operation of the public universities in Mississippi during the summer of 1985 and the 1985-86 Regular Session. It contains the primary measures of academic production: enrollments, classes, student credit hours, and degrees awarded. It also contains the revenues and expenditures for the eight universities in Mississippi.

Enrollments are shown by semester or quarter, on-campus or off-campus. The enrollments are depicted by full-time and part-time, school/division, resident and non-resident, and full-time-equivalent. Extension class enrollments are reported as enrollees in class.

The student credit hour production is classified into fields of study according to the Classification of Instructional Programs (CIP) Taxonomy. The student credit hours are shown according to class levels, on-campus and off-campus, and regular session and summer session. These data are matched with the actual investments for 1985-86 in determining the cost per student credit hour to be used in the "formula" calculation of the state appropriation requests.

This publication also shows the number of degrees awarded from July 1, 1985, through June 30, 1986. These are broken down by baccalaureate, master's, specialist and sixth-year, and doctoral degree programs according to the Classification of Instructional Programs (CIP) system. Associate degrees and certificates awarded during the same period are displayed as well.

Actual revenues received during the fiscal year are reported according to source of income from restricted and unrestricted funds, and the percents of each source derived from total Education and General income are shown in the report.

Information regarding actual expenditures for restricted and unrestricted purposes is reported according to functions. The investment per student credit hour for instruction has been derived using only expenditures of unrestricted current General Funds. The data depicting investment per student credit hour by instruction have been classified in the academic fields listed by CIP.

Data reflecting student credit hour investment for instruction are used to determine the rate per student credit hour in 1985-86. This rate, applied by groups to the total production of an institution for the year 1985-86 forms the base for the allocation of state appropriations to each institution for fiscal year 1988.

Statistics for the year 1985-86 are available in other publications of the Board of Trustees. The January, 1986, statistical report includes information about enrollment, residence, and dormitory utilization for the first term only of 1985-86. Scholarships and financial aid awarded are also shown in the same publication.

# PREFACE

This statistical report contains data which provide insight into the operation of the public universities in Mississippi during the summer of 1986 and the 1986-87 Regular Session. It contains the primary measures of academic production: enrollments, classes, student credit hours, and degrees awarded. It also contains the revenues and expenditures for the eight universities in Mississippi.

Enrollments are shown by semester or quarter, on-campus or off-campus. The enrollments are depicted by full-time and part-time, school/division, resident and non-resident, and full-time-equivalent. Extension class enrollments are reported as enrollees in class.

The student credit hour production is classified into fields of study according to the Classification of Instructional Programs (CIP) Taxonomy. The student credit hours are shown according to class levels, on-campus and off-campus, and regular session and summer session. These data are matched with the actual investments for 1986-87 in determining the cost per student credit hour to be used in the "formula" calculation of the state appropriation requests.

This publication also shows the number of degrees awarded from July 1, 1986, through June 30, 1987. These are broken down by baccalaureate, master's, specialist and sixth-year, and doctoral degree programs according to the Classification of Instructional Programs (CIP) system. Associate degrees and certificates awarded during the same period are displayed as well.

Actual revenues received during the fiscal year are reported according to source of income from restricted and unrestricted funds, and the percents of each source derived from total Education and General Income are shown in the report.

Information regarding actual expenditures for restricted and unrestricted purposes is reported according to functions. The investment per student credit hour for instruction has been derived using only expenditures of unrestricted current General Funds. The data depicting investment per student credit hour by instruction have been classified in the academic fields listed by CIP.

Data reflecting student credit hour investment for instruction are used to determine the rate per student credit hour in 1986-87. This rate, applied by groups to the total production of an institution for the year 1986-87 forms the base for the allocation of state appropriations to each institution for fiscal year 1989.

Statistics for the year 1986-87 are available in other publications of the Board of Trustees. The January, 1987 statistical report includes information about enrollment, residence, and dormitory utilization for the first term only of 1986-87. Scholarships and financial aid awarded are also shown in the same publication.

# PREFACE

This statistical report contains data which provide insight into the operation of the public universities in Mississippi during the summer of 1987 and the 1987-88 Regular Session. It contains the primary measures of academic production: enrollments, classes, student credit hours, and degrees awarded. It also contains the revenues and expenditures for the eight universities in Mississippi.

Enrollments are shown by semester or quarter, on-campus or off-campus. The enrollments are depicted by full-time and part-time, school/division, resident and non-resident, and full-time equivalent. Extension class enrollments are reported as enrollees in class.

The student credit hour production is classified into fields of study according to the Classification of Instructional Programs (CIP) Taxonomy. The student credit hours are shown according to class levels, on-campus and off-campus, and regular session and summer session.

This publication also shows the number of degrees awarded from July 1, 1987, through June 30, 1988. These are broken down by baccalaureate, master's, specialist and sixth-year, and doctoral degree programs according to the Classification of Instructional Programs (CIP) system. Associate degrees and certificates awarded during the same period are displayed as well.

Actual revenues received during the fiscal year are reported according to source of income from restricted and unrestricted funds, and the percents of each source derived from total Education and General Income are shown in the report.

Information regarding actual expenditures for restricted and unrestricted purposes is reported according to functions.

Statistics for the year 1987-88 are available in other publications of the Board of Trustees. The February, 1989 statistical report includes information about enrollment, residence, and dormitory utilization for the first term only of 1987-88.
